

You must hold a current teaching license to apply to this program. If you do not hold a current Arkansas teaching license, please note that completing the Master of Special Education program and/or completing the optional certificates does not grant you licensure to teach in the state of Arkansas. Please view the licensure/certification requirements for your state.

In most cases, other states will require proof that the student has successfully completed a state-approved teacher licensure program. Assistance in securing this license is provided to all of those who are completing student teaching/internship; this is processed after all coursework has been successfully completed and the degree has been posted.

Licensure information is typically available online for the various State Departments of Education in other states. Those wishing to pursue licensure in other states should obtain the necessary information and application materials for the processing of requests.

Please sign this document stating that you understand the above information.
