

Arkansas Tech University Archaeological Field School

Register of Professional Archaeologists Certified
RPA4 - Field and Laboratory Training Program

May 20-June 14, 2024

Course Description

An archaeological field school, a practical training experience focused on developing in-demand skills in Cultural Resource Management.

Through lecture, exercises, and participation in archaeological field projects students master methods of archaeological survey, excavation, materials recovery, site data recording, and assemblage processing.

Because the class is held in partly in field conditions, students are also required to learn to work together as a group in challenging settings while they contribute to the success of long-term archaeological research projects.
