

# Germany

## Engineering and Energy Technology: Germany

Dates: July 17- August 18, 2025

The Engineering and Energy Technology program will provide ATU engineering students the opportunity to connect with students at THM in Giessen, our partner university in Germany.

Students will travel to Germany and tour the cities of Frankfurt, Giessen, and Kassel. Also, students will take a trip to Mosel Valley, with an additional day dedicated to cultural immersion in Germany. Students will gain experience with the following concepts: applied artificial intelligence in mechanical engineering and energy technology, motorboat design, hydrogen and alternative fuels, and vehicle dynamics.

**Cost: \$3000**
